DETAILED ACTION

Response to Arguments

1. Applicant's arguments and amendments, filed on 03/02/2007, with respect to the rejection(s) of claim(s) 1-11 under 35 U.S.C 112 first paragraph have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

Drawings

2. The informal drawings Fig.4 – Fig.35 are not of sufficient quality to permit examination. Accordingly, replacement drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to this Office action. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action.

Applicant is given a TWO MONTH time period to submit new drawings in compliance with 37 CFR 1.81. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a). Failure to timely submit replacement drawing sheets will result in ABANDONMENT of the application.

Claim Objections

3. Claim 1 is objected to because of the following informalities:

- Claim 1, line 1, change "DSL for LDSL" to --- digital subscriber lines (DSL) to Long reach digital subscriber lines (LDSL) ---.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-11 would be allowable if rewritten to overcome the objection(s) set forth in this Office action.

5. The following is an examiner's statement of reasons for allowance.

- The prior art fails to teach an apparatus of Claim 1 that specifically comprises the following:
 - The instant application is deemed to be directed to a non-obvious improvement over the admitted prior art of the instant application and the invention patented in Pat. No. US 6,333,920 and Dynamic Spectrum Management for Next-Generation DSL Systems, Song et al., IEEE Communication Magazine, October 2002. The improvement comprises that "selecting from the number of spectral masks an upstream mask and a downstream mask based on pre-defined optimization criteria such that for a given transmit power, channel capacity is maximized in both upstream and downstream directions while spectral compatibility is maintained between upstream and downstream channels as well as with neighboring services." as recited in combination with other limitation as claimed in claim 1.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

The drawing and claims are objected by the examiner.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
